

BAX GLOBAL AUTOMATION

OVERVIEW

Automate shipping with BAX Global. Your Kewill shipping solution will enable you to ship via BAX Global while gaining the ability to shop for competitive rates across multiple carriers, maintain one global customer list, easily trace shipments regardless of the carrier, and produce all-inclusive shipping reports.

FEATURES

- Calculates BAX Global rates.
- Prints BAX Global thermal labels.
- Generates a manifest file for electronic transmission to BAX.
- Produces a shipping manifest for your records.
- Supports domestic services.
- Provides full-user access to BAX rate & routing tables so you can import rates when they change.
- Supports multiple billing methods.
- Archives shipping information for future tracking purposes.
- Improves service times through reduction in package handling.
- Minimizes training requirements and improves package handling by enabling multiple carriers to be processed on a single system.

BAX Global approval is required.
