

DHL Automation

Automate shipping with DHL. Your Kewill shipping solution will enable you to ship via DHL while gaining the ability to shop for competitive rates across multiple carriers, maintain one global customer list, easily trace shipments regardless of the carrier, and produce all-inclusive shipping reports.

Features

- Calculates DHL rates.
- Prints DHL waybills.
- Produces a shipping manifest for your records.
- Supports both domestic and international services. (Requires entry of the International Destination Routing codes.)
- Provides full user access to DHL rate & zone tables so that you can modify rates when they change.
- Generates special barcoded shipping label per DHL specifications*.
- Produces electronic manifest file, which DHL uses for billing.*
- Generates shipping label in addition to the DHL airwaybill for international shipments.*
- Eliminates hand-written documentation to improve accuracy and expedite processing.
- Improves service times through reduction in package handling.
