

EMERY FORWARDING AUTOMATION

Clippership®

OVERVIEW

Automate shipping with Emery Forwarding services. Clippership's support of Emery's Gemini API gives shippers the ability to calculate Emery rates, generate Emery labels, and transmit electronic manifests. Clippership manages multi-carrier requirements, simplifies automation, supports flexible data integration, and performs extensive rate shopping to determine optimal rates and routing.

Emery Forwarding provides a variety of value-added supply chain services focusing on the movement of heavyweight freight for commercial, industrial and government customers worldwide.

FEATURES & BENEFITS

- Calculates Emery rates
- Prints Emery thermal labels
- Produces a shipping manifest for your records
- Produces an electronic manifest file for transmission to Emery
- Supports domestic and International services
- Enables direct access to Emery rating and routing tables in the event of a rate/route update.
- Supports multiple billing methods
- Supports Emery parcel consolidation

* See adjacent list for support services. Emery Forwarding approval is required.
