

FEDEX EXPRESS AUTOMATION

OVERVIEW

Ship via FedEx while gaining the ability to shop for competitive rates across multiple carriers, maintain one global customer list, easily trace shipments regardless of the carrier, and produce all-inclusive shipping reports.

FEATURES

- Calculate FedEx rates.
- Prints FedEx air waybills.
- Generates a shipping manifest for your records.
- Supports both domestic and international services.
- Provides full user-access to FedEx rate & zone tables so that you can modify rates when they change.
- Supports multiple billing methods (i.e., 3rd Party and Bill Recipient).
- Archives shipping information for future tracking purposes.
- Minimizes training requirements and improves package handling by enabling multiple carriers to be processed on a single system.
- Support FedEx PowerShip Server for qualifying shippers.*
 - Supports thermal shipping labels per FedEx specifications, in place of air waybills.
 - Daily electronic transmission of data files to FedEx via the FedEx PowerShip Server.
 - Supports electronic transmission of monthly URSA routing files, customer-specific rates, and tracking numbers.
 - Self-invoicing.

* Shippers must apply for FedEx PowerShip Server approval. Typically, FedEx requires a minimal average volume of 100+ packages/day or \$1400 in daily FedEx revenue.
