

LTL RATING COMPLIANCE

Powered by SMC³'s RateWare[®]

Clippership[®]

OVERVIEW

Clippership's support of SMC³'s RateWare[®] technology provides shippers with the most comprehensive system to manage compliance for both parcel and LTL shipments. The addition of RateWare technology expands Clippership's LTL capabilities and provides one system to manage all transportation needs. The solution offers a simplified process for updating LTL tariff information while the ability to rate shop across all parcel and LTL carriers simplifies transportation decisions and reduces shipping costs.

BENEFITS

- A simplified process for updating LTL tariff information
- Accurate decision-making on transportation pricing for both parcels and LTLs
- Ability to define various discounting methods for LTL carriers
- Ability to import more than 3,500 different Rate Modules offered by SMC³
- Reduced labor cost through fewer manual processes
- Faster responses to shipping inquiries
- One system to manage all transportation needs

**Fully realize the advantages
of a durable rating engine
with hundreds of users,
over a decade of dependable
performance and over 3,500
modules for transportation
pricing and service data.**
